

ICT SILVER BULLET & KILLZONES

OFFICIAL TRADER DESK COPY

CORE STRATEGY SUMMARY: Institutional footprints, bullish/bearish order blocks, fair value gaps (FVG), and liquidity sweeps....

BULLISH ORDER BLOCK (OB+) RULES

Identification

Last bearish down-candle before an aggressive impulse breakout creating Fair Value Gap.

Trigger: Must cause clean Break of Structure (BOS) on 15M/1H chart.

Mitigation Entry

Limit order placed at 50% Mean Threshold of the order block.

Trigger: Stop Loss set 5 pips below order block swing low.

BEARISH ORDER BLOCK (OB-) RULES

Identification

Last bullish up-candle before strong impulsive selling displacement.

Trigger: Must sweep buy-side liquidity before breaking swing low.

Mitigation Entry

Sell limit placed at open / 50% body of the bearish candle.

Trigger: Take profit target at opposing sell-side liquidity pool.

LIQUIDITY SWEEPS & TIMING

London Killzone Sweep

Asian high/low swept between 08:00 - 09:30 GMT before true trend expansion.

Trigger: Wait for 5M market structure shift (MSS) before entering.

NY Open Judas Swing

False breakout into institutional pool between 13:00 - 14:00 GMT.

Trigger: Enter with momentum in direction of London order flow.
